

FastRack510-6dg™ Supports Pure Country Weavers Under Iconic Blue Ridge Mountains

Key Project Facts:

Location & Year

Mill Springs, NC 2024

System Size

264 kW-DC

Mounting System

Sollega™ FastRack 510-6dg at 10° tilt

Modules

(527) PS-M144(HCBF)

Pure Country Weavers is a textile manufacturer located in Mill Spring North Carolina. Framed by the iconic Blue Ridge Mountains, this idyllic build will offset 264 kW. The solar is fully ballast roof-mounted and did not necessitate any mechanical anchors. Sollega provided the photovoltaic system and 480 FastRacks for 527 modules.

Quote from the Project Lead:

"This is what I can tell you about Sollega's ballasted racking system: It was easy to figure out/learn and understand. It was easy to assemble the process was quick. I mean very quick. They completed the build three weeks before any of us had expected. This was this particular installer's first time with a ballasted system, and they are very much looking forward to the next TPO roof we send their way." [?]
