

Certificate of Compliance

Inflation Reduction Act

Sollega confirms that our Fastrack (FR510-6dg) (manufactured product) were manufactured in the declared country of origin (USA) in the amounts and allocations reported. We source our raw material from BASF which is compounded in Tennessee and Texas. We injection mold our racking in Baldwin Park CA and source our aluminum pull/end clamps from Ohio.

The domestic manufactured products comply fully with the specifications and requirements in the Official US Treasury IRA ITC Guidance (Notice 2025-08): The Domestic Content Requirement with respect to Manufactured Products (Manufactured Products Requirement) applies in a manner consistent with 49 CFR § 661.5(d). See §§45(b)(9)(B)(i) and 45Y(g)(11)(B)(i). The Manufactured Products Requirement is met if all Applicable Project Components that are Manufactured Products are produced in the United States or are deemed to be produced in the United States. All Applicable Project Components that are Manufactured Products are deemed to be produced in the United States if the Adjusted Percentage Rule described in section 3.03(2) of this notice is satisfied.

Non-Steel Roof Racking
