

Domestic Content: Treasury Notice 2025-08

Rev. 260108

Sollega's FastRack 510-6dg C&I racking system is FEOC compliant. The following components are manufactured in the United States:

- FastRack 510-6dg (FR510-6dg) (injection molded in Baldwin Park CA)
 - Raw Material (Glass reinforced Nylon 6) Compounded in the U.S.
- Aluminum Clamps and Rail (Mechanical Anchor Components)
 - Pull Clamp (FR-PC-A)
 - End Clamp (FR-EC)
 - Eco Standard Aluminum Rail (Eco Standard Aluminum Rail - 9 FT (108"/2740mm), 10 FT (120"/3050mm))

Our components are manufactured in California and Ohio. Sollega has been proudly U.S. made since 2010.

To meet the criteria for tax credit incentives, solar projects must have a combination of modules, inverters, and racking with a minimum aggregate threshold of 45% domestic content.

Achieving 45%

- Sollega's FR510-6's are UL 2703, UL 3741, & FEOC compliant & have an industry leading warranty of 25 years.

Who is Eligible?

- Only eligible taxpayers, typically commercial entities, project owners, and third-party financing structures, can claim the bonus credit.
- EPCs and installers cannot claim the credit directly.

Build Your Supply Chain Wisely

- Pair Sollega racking with domestically manufactured modules, inverters, and BOS components when targeting the 45% domestic content bonus credit.
- Multiple compatible options allow flexibility in system design while maintaining compliance pathways.

Understand the Code

- Understand key definitions and requirements for domestic content eligibility.
- Request manufacturer certifications and letters of attestation for your tax and legal advisors.
- Sollega can provide traceability documentation upon request to support audits.

Keep Documentation

- IRS and financier reviews may require detailed documentation of material origin, cost breakdowns, and certifications.
- Ensure that all suppliers can provide the necessary documentation for verification.
- Domestic content rules continue to evolve and may differ across guidance updates.
