

FastRack510™ Ground Mount Racking

The Perfect Solution for Sensitive Installation Areas

Benefits of the FastRack™ System

- No assembly required
- **Non-corrosive, non-conductive** polymer engineered for extreme conditions
- **No Ground Penetration**—Ideal solution for brownfields, landfill, gravel, concrete, low-pitch asphalt surfaces
- Quick to manufacture, ship, stage and install
- **GCR of 72-80%**. 1.7 acres/MW and 53' trailer/MW
- **Minimal ground preparation required (aggregate and geotextile barrier)**
- Reduced environmental impact
- Minimal geotechnical engineering required
- Full engineering support, design flexibility, & ability to provide wet stamp in all 50 states
- Fully ballasted, 5,6 and 10dg tilt options, 6" and 8" leading edge height
- UL 2703 Listed—Injection Molded in USA (25 year warranty)

About Sollega™

Sollega designs, tests and manufactures solar mounting solutions serving the US market. The FastRack FR510 is a patented, one-piece, injection molded solar racking system designed for both commercial low-pitch roofs and ground mount installations. It is made from glass-reinforced nylon 6, for strength and durability in a lightweight package. Sollega racking systems are compatible with all common solar panels currently on the market. All attachments are top mount, enabling easy installation and removal.
